This CHECKLIST is designed to both:

- Generate Ideas
- Organize your needs

Please consider your making notes / recording questions is valuable to us in the design process.

Regardless of the type of work performed on your property, the mixture of materials and colour choices create a *mood* or *theme*, desired or not. This section is designed to guide those who are concerned about creating or maintaining a certain feel to their property through the proposed construction.

Bright colours as an example create a cheerful environment, while subdued natural tones a more relaxed atmosphere. Clean, straight lines and modern material choices represent a more *Contemporary* feel, where tumbled / aged products combined with curves / arches result in an *Old English* or *Rustic* ambience. Your choices together with our helpful direction and implementation strategies through design can bring the desired outcome on your property.

The following have general implications representing ALL DIVISIONS inside and out of your home.

The MOOD of our space should be:

Bright / Cheerful   Relaxing   Private   Social   Structured   Other: \_\_\_\_\_
